

ARYAN DALWADI

Ahmedabad, India | +91- 9558046979 | aryandalwadi@gmail.com

<https://github.com/AryanDalwadi?tab=repositories> | <https://www.linkedin.com/in/aryan-dalwadi/>

Full stack Developer | Node.js | React.js

Full Stack Developer with 2.5+ years of experience building and scaling web applications using React.js, Node.js, and MSSQL. Specialized in designing high-performance REST APIs, real-time systems, and multi-tenant SaaS architectures. Experienced in third-party API integrations, webhook handling, JWT-based authentication, state management with Redux & Context API, and applying security best practices (CORS, Helmet, XSS prevention). Delivered measurable improvements — ~30% API latency reduction and ~40% SQL query optimization — across logistics, CRM, and healthcare platforms.

Work Experience

Prashi Solution, Ahmedabad | Full Stack Developer

Dec 2023 - Present

- **Engineered and scaled** a multi-tenant SaaS CRM platform (CRM Emperor) supporting Real Estate, Billing, CMS, and Admin modules used by multiple clients on isolated tenant databases.
 - Built and maintained 80+ **RESTful API** modules using Node.js & Express with structured error handling middleware, request validation, and standardized response models.
 - **Architected and optimized RESTful APIs** using Node.js and Express, enhancing scalability and reducing response latency
 - Implemented **JWT-based authentication** with **AES-encrypted** request bodies, **CORS** configuration, **Helmet.js** security headers, and **XSS prevention** across all API endpoints.
 - **Designed and enforced RBAC-based menu-driven authorization, ensuring secure, role-scoped access control across all modules.**
 - **Optimized backend workflows, reducing API response time by approx. 30% and improving data processing efficiency**
 - Optimized MSSQL queries, reducing execution time by approx. 40% for critical operations, including query optimization and schema design
- **Haulerr – Logistics & Delivery Platform:**
 - **Designed and deployed a full-stack logistics platform** with real-time rider tracking and alert system
 - Implemented dynamic fare calculation with GST/IGST logic
 - Designed polygon-based zone mapping using Google Maps API
 - Integrated Wabus WhatsApp API for OTP authentication and order notifications (webhook-driven).
 - Integrated Redis and Firebase to enable real-time data synchronization and push notifications
 - **Fusion Pizza – Billing & Inventory System:**
 - **Engineered a billing and inventory system** with real-time GST computation and automated invoice generation (PDF)
 - Built inventory tracking dashboard for multi-outlet restaurants
 - Implemented audit logs and reporting for compliance and transaction tracking
 - **IVF Management System (Esha IVF):**
 - **Developed a scalable healthcare management system** for patient lifecycle, appointments, and lab workflows
 - Developed modules handling 200+ patient workflows daily including appointments and lab processing
 - Integrated Firebase/WhatsApp for automated communication
 - Designed secure admin dashboard and backend APIs
 - **File Manager System:**
 - Built document mapping system linking Excel data with PDFs via barcode logic; handled 10,000+ files with optimized search.
 - Implemented dynamic folder structure with CRUD operations
 - **Loan Processing Module:**
 - Developed a multi-step loan workflow system handling 100+ applications daily with approval hierarchy
 - Implemented document upload (AWS S3), borrower/surety management, notification system, and PDF generation

Shersmart Infotech, Ahmedabad | Intern

Jul 2023 – Dec 2023

- **Developed reusable and responsive UI components** using React.js and Material UI
- Implemented CRUD operations via REST APIs
- Leveraged React hooks and state management to enhance UI performance and maintainability
- Improved UI performance and responsiveness

- Developed a **Bank Statement Analyser** web application during internship at Linear loop Pvt. Ltd.
- Designed and developed a **Bank Statement Analyser** web application to automate extraction, analysis, and visualization of financial statements
- The project automated extraction and analysis of bank statements to assess creditworthiness of users. Built using **Python, Flask, Pandas, NumPy, and SQL Alchemy**, it provided interactive **data visualization** with Dash and Matplotlib. Implemented modules for **PDF-to-CSV conversion, user authentication, and real-time analytics**.

Skills

Programming Languages: JavaScript, SQL

Frontend: React.js, Redux Toolkit, Context API, Material-UI (MUI), React Router, React Hook Form, Axios, Fetch API,

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Webhooks, Third-Party API Integration, Error Handling Middleware

Security: JWT Auth, CORS, Helmet.js, XSS Prevention, AES Encryption, SQL Injection Prevention (Parameterized Queries)

State Management: Redux Toolkit, Redux Persist, Context API, React Hooks

Databases: MSSQL, MySQL — Query Optimization, Stored Procedures, Schema Design

Cloud & Tools: AWS S3, Firebase (FCM), Redis, Node-Cron, Git & GitHub (Version Control), PM2, CI/CD Pipelines

Integrations: Google Maps API, WhatsApp Business API (Wabus), Firebase Push Notifications

Other: API Optimization, Real-time Systems, Multi-Tenant Architecture, System Design, PDF Generation, Barcode Processing

Projects

- Logistics CRM with real-time tracking and analytics
- Billing & Inventory system with GST automation
- Healthcare management platform with secure workflows
- File/document management system with mapping logic

Education

Silver Oak College of Engineering and Technology, Ahmedabad, Gujarat

2018 - 2022

- B.E. - Information Technology | **CGPA: 8.68**

Certificates

- Diploma in multilingual computer programming(C-DAC) **Jan – Jul 2019**
- Udem python for data science and data analysis
