Full Stack Developer | React.js | Node.js

Full Stack Developer with 3 years of experience building scalable web applications using React.js, Node.js, Express.js, and MSSQL. Experienced in developing responsive and reusable React interfaces, state management with Redux Toolkit and Context API, RESTful API integration, authentication and authorization, database optimization, and third-party integrations. Strong focus on performance, security, maintainability, debugging, and delivering scalable full-stack solutions.

WORK EXPERIENCE

Prashi Solution, Ahmedabad | Full Stack Developer

Dec 2023 – Present

Project Experience: SaaS CRM, Logistics & Delivery, Billing & Inventory, Healthcare, Document Management, and Loan Processing platforms.

Core Responsibilities

- Developed responsive and reusable **React.js** components using **Redux Toolkit**, **Context API**, **React Router**, and **Material UI** to build maintainable enterprise application interfaces.
- Integrated **React.js** frontends with **RESTful Node.js APIs**, implementing form handling, state management, validation, and responsive user workflows across enterprise applications.
- Engineered and scaled a **multi-tenant SaaS CRM platform** (CRM Emperor) supporting Real Estate, Billing, CMS, and Admin modules for multiple clients using isolated tenant databases with secure tenant-level data isolation.
- Built and optimized **80+ RESTful API modules** using **Node.js** and Express with request validation, structured error handling, standardized responses, and scalable API design for consistent backend processing.
- Implemented **JWT/AES authentication**, **CORS**, **Helmet.js**, **XSS prevention**, and **RBAC-based menu authorization** to provide secure, role-scoped access across application modules and API endpoints.
- Optimized backend workflows and **MSSQL** queries, reducing API response time **by ~30%** and critical query execution time by **~40%** across key application operations and database processes.
- Optimized React.js components and frontend workflows to improve rendering performance, responsiveness, and maintainability across enterprise applications.
- Ensured responsive and cross-browser compatible React interfaces while following accessibility practices for consistent and user-friendly experiences.
- Managed Git-based development workflows using Azure DevOps, including branch creation, pull requests, code reviews, and controlled code merging across development activities.
- Participated in sprint planning, daily stand-ups, task estimation, code reviews, and sprint retrospectives.
- Collaborated with QA, frontend/backend developers, and project teams to understand requirements, troubleshoot issues, and deliver application features.

Key Projects

Haulerr – Logistics & Delivery Platform | React.js, Node.js, Express.js, Google Maps API, Redis, Firebase, WhatsApp API

- Developed responsive **React.js** interfaces for **order management**, **rider tracking**, and operational workflows integrated with **RESTful backend APIs**.
- Designed and deployed a full-stack logistics and delivery platform with **real-time rider tracking** and an alert system to support order fulfilment and rider operations.
- Implemented a dynamic fare calculation workflow with **GST/IGST** logic to accurately calculate delivery pricing based on the configured pricing rules.
- Designed polygon-based service zones with **Google Maps API** and integrated **WhatsApp Business API** for OTP authentication and **webhook-driven order notifications**.

Fusion Pizza – Billing & Inventory System | Billing, Inventory, GST, PDF Invoice Generation

- Engineered a billing and inventory system with **real-time GST computation and PDF invoices**, plus an inventory dashboard supporting **multiple restaurant outlets** and daily stock operations.
- Implemented audit **logs and reporting** capabilities to maintain transaction history, support compliance requirements, and improve operational and compliance tracking.

IVF Management System – Esha IVF | React.js, Node.js, Express.js, Firebase, WhatsApp

- Developed a scalable healthcare platform covering patient lifecycle, appointments, and lab workflows, with modules supporting **200+ patient workflows daily** across core operations.
- Integrated Firebase and WhatsApp for automated communication and designed secure admin dashboards and backend APIs for controlled healthcare workflow management.

File Manager System | Excel, PDF, Barcode Processing

- Built a document mapping system linking Excel records with PDFs through barcode-based logic and handled **10,000+ files** with optimized search.
- Implemented a dynamic folder structure with CRUD operations.

Loan Processing Module | AWS S3, Document Management, Notifications, PDF Generation

- Developed a multi-step loan workflow system handling **100+ applications daily** with an **approval hierarchy**.
- Implemented document uploads using **AWS S3**, borrower and surety management, notification workflows, and PDF generation.

Role Highlights

- Developed reusable responsive UI components with **React.js** and **Material UI**, and implemented CRUD workflows through REST APIs for maintainable frontend development.
- Used React Hooks and state management to improve UI performance, responsiveness, and maintainability through reusable component design and optimized frontend workflows.

Parshi Emerging Technologies PVT LTD, Remote | Intern

Jul 2022 – Dec 2022

Role Highlights

- Learned and applied Object-Oriented Programming concepts in Python, including classes, objects, inheritance, polymorphism, and encapsulation.
- Gained hands-on experience with NumPy, Pandas, and other Python libraries for data manipulation, analysis, and problem-solving using the Python interpreter.

Linear Loop Private Limited, Ahmedabad | Intern

Jan 2022 – Apr 2022

Bank Statement Analyzer – Project Experience

- Developed a Bank Statement Analyzer web application to automate extraction, analysis, and visualization of financial statements.
- Built the application using Python, Flask, Pandas, NumPy, and SQLAlchemy, with interactive data visualization using Dash and Matplotlib.
- Implemented PDF-to-CSV conversion, user authentication, and real-time analytics modules to support automated financial statement analysis and creditworthiness assessment.

SKILLS

Programming Languages: **JavaScript (ES6+)**, **SQL**

Frontend: **React.js**, **HTML5**, **CSS3**, **Redux Toolkit**, **Context API**, **Material-UI (MUI)**, **React Router**, **React Hook Form**, **Responsive UI Development**

Backend: **Node.js**, **Express.js**, **REST APIs**, **JWT Authentication**, **RBAC**, **Webhooks**, **Third-Party API Integration**

Databases: **MSSQL**, **MySQL** — **Query Optimization**, **Stored Procedures**, **Schema Design**

Security: **JWT Auth**, **CORS**, **Helmet.js**, **XSS Prevention**, **AES Encryption**, **SQL Injection Prevention**

Testing & API Tools: **Postman**, **REST API Testing**, **API Validation**, **Debugging**

Version Control & DevOps: **Git**, **GitHub**, **Azure DevOps**, **Pull Requests**, **Code Reviews**, **CI/CD**, **PM2**

Cloud & Tools: **AWS S3**, **Firebase (FCM)**, **Redis**, **Node-Cron**, **Google Maps API**, **WhatsApp Business API (Wabus)**,

Architecture & Practices: **API Optimization**, **Real-time Systems**, **Multi-Tenant Architecture**, **System Design**

Development Practices: **Agile/Scrum**, **SDLC**, **Code Reviews**, **Git-based Development**, **Debugging**

EDUCATION

Silver Oak College of Engineering and Technology, Ahmedabad, Gujarat | 2018 – 2022

B.E. – Information Technology | CGPA: 8.68

CERTIFICATES

- Diploma in Multilingual Computer Programming (C-DAC) | Jan – Jul 2019
- HTML, CSS, JavaScript, React – Online Certification Course
- React – The Complete Guide (incl. Hooks, React Router, Redux) – Udemy
- Udemy Python for Data Science and Data Analysis
